

Power Bank

Take your energy back.

Community Battery Storage

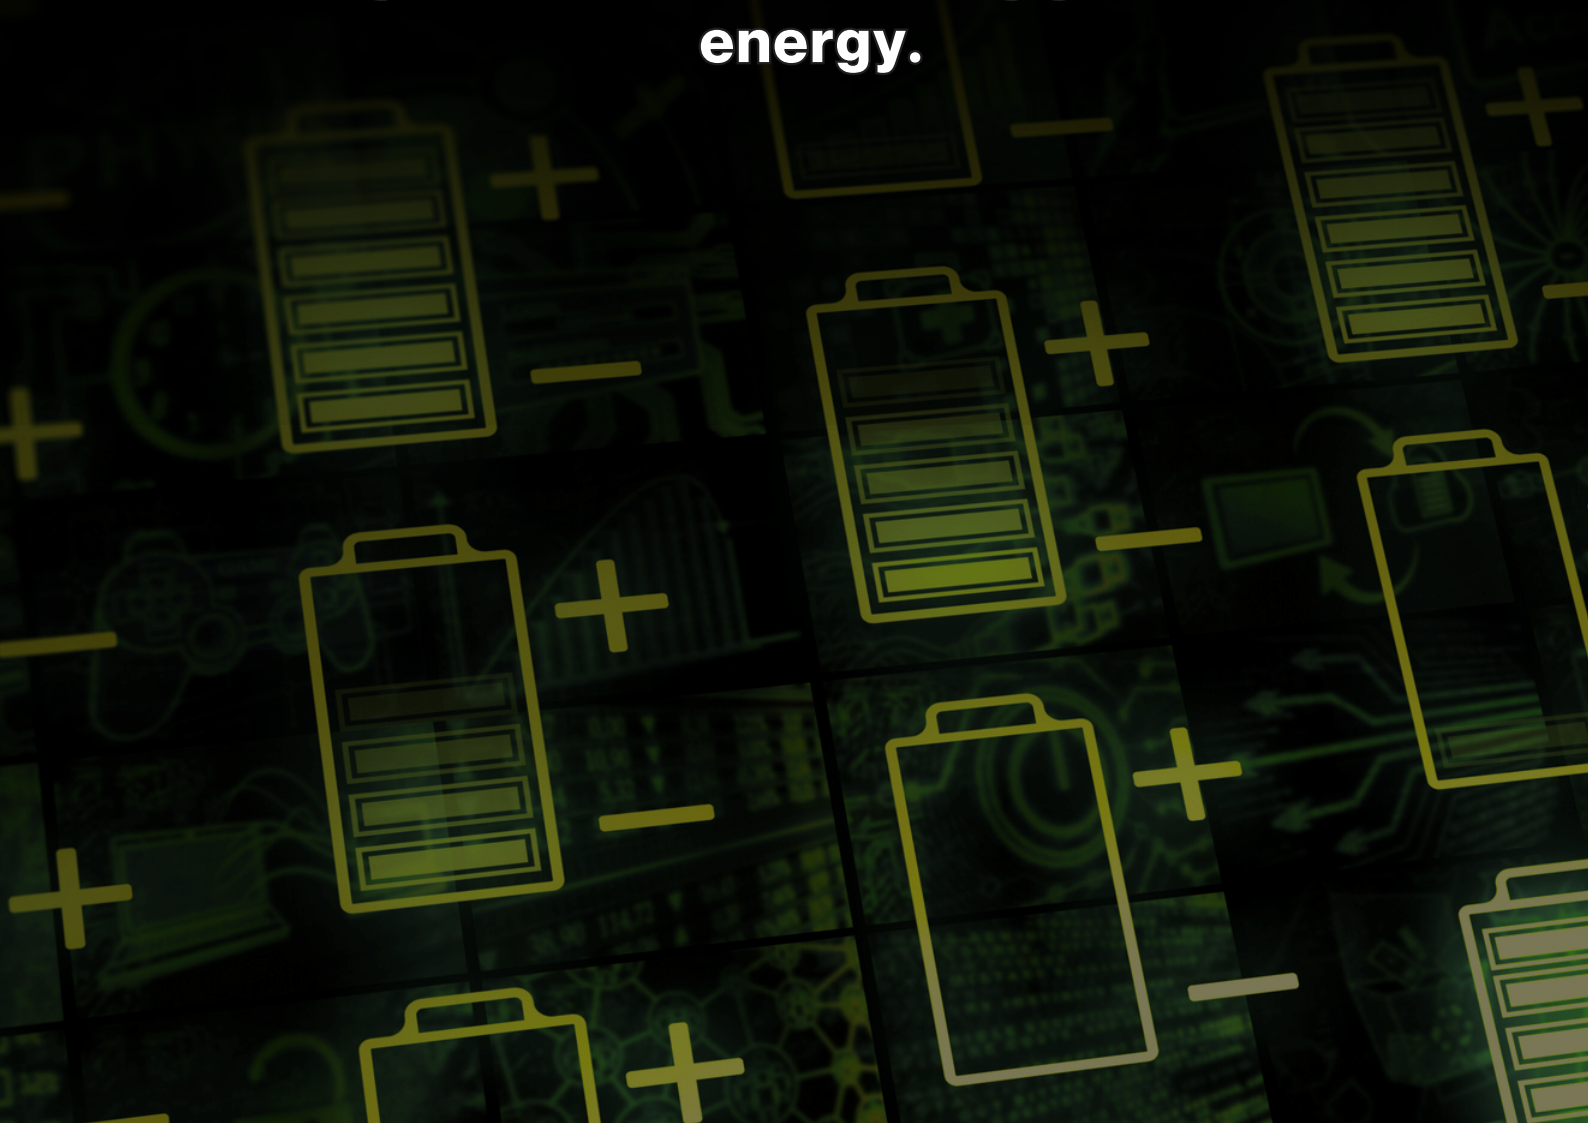

MacarthurEnergy
POWERING LOCAL LIFE

Welcome to the Future of Energy

Thank you for taking the time to explore our
vision at Macarthur Energy.

We believe that accessing clean, **reliable energy**
should be as simple as powering up your phone.
Our **Power Bank** solution puts the power back in
your hands—literally.

Get ready to **transform** the way you think about
energy.

Empowering Choice, Empowering You

Macarthur Energy is dedicated to making energy simple, accessible, and sustainable.

We start by understanding your unique energy needs and then create tailored solutions that focus on your lifestyle—whether your goal is to save on costs or minimise your environmental footprint.

Our mission is to deliver freedom and flexibility through smart energy storage.

Why Choose Our **P**ower Bank?

This isn't just a battery—it's **freedom** from high bills, flexibility to adapt as your needs change, and peace of mind knowing that you're investing in cutting-edge technology.

Take your energy back.

MacarthurEnergy
POWERING LOCAL LIFE

Your Energy Partner

Founded by Mathew Cox, an experienced electrician with a passion for sustainability, Macarthur Energy has been at the **forefront** of renewable solutions since 2015.

Our journey has been driven by one core idea: **making smart energy choices accessible to every home and business.**

With roots in Macarthur and a focus on community, we're here to guide you into a cleaner, smarter future.

What Makes The **P**wer Bank Different?

Simple. Affordable. Hassle-Free.

- **No Installation Needed:** Start saving right away—no setup required.
- **Zero Space in Your Home:** All storage is managed externally, keeping your space free.
- **Flexible Storage:** Suited to your budget — upgrade as needed.
- **No More Low Feed-in Tariffs:** Store your energy with the Power Bank and use it when you need it, instead of selling it back for minimal returns.
- **Maintenance-Free:** We handle all upkeep so you can focus on saving.

Why We Prefer **P**wer Bank Over Traditional Household Batteries

Traditional Batteries

- **High Upfront Costs:** Buying and installing a household battery can be expensive, even with prices dropping.
- **DIY Maintenance:** Responsible for monitoring and maintaining multiple batteries, which can be a headache.
- **Capacity Fade:** Over time, batteries lose their capacity, requiring costly replacements.

Pwer Bank

- **Affordable Entry Point:** Connect to our community battery starting at just \$550 per kWh including gst.
- **Hands-Free Service:** Our team manages all the maintenance and upgrades—no need to worry about technical details.
- **Built to Last:** Designed with industry-leading technology, our batteries offer reliable performance and are regularly upgraded.

How Does It Work?

Think of our **Power Bank** like your home's personal power reserve. Here's how it works:

- 1. Daytime Savings:** During the day, when rates are lower, the Power Bank stores energy for you.
- 2. Nighttime Savings:** At night, use your stored energy instead of paying higher rates.
- 3. Flexible Options:** Buy a 10 kWh unit outright for \$5,500 including gst and **upgrade as you go** — all with no maintenance fees.

Pricing Options to Suit Your Needs

Power Bank Essentials:

**5 kWh - Ideal for apartments and smaller homes.
\$2750 including gst**

Power Bank:

**10 kWh - Perfect for the average household.
\$5,500 including gst**

Power Bank Plus:

**15 kWh - Tailored for larger homes.
\$8,250 including gst**

Power Bank Ultimate:

**25+ kWh - Designed for higher energy needs.
Custom pricing—get in touch to tailor your plan.**

Return on Investment (ROI): A Smart Choice for Your Wallet

A 10 kWh investment saves an average of \$3.50 per day, translating to \$1,277.50 a year. With a purchase price of \$5,500, you'll break even in 4.3 years and save over \$25,500 in the battery's lifetime.

How to Get Started: 3 Easy Steps

- 1. Connect with Us:** Schedule a call with one of our Renewable Energy Advisors.
- 2. Choose Your Storage:** Select the best storage size for your needs.
- 3. Start Saving:** Get connected, and watch your energy bills drop.
